

ISIPOOL DOSING SYSTEM

Two versions available for pH or ORP control. The system provides automatic proportional dosing of chemicals with a digital display of pH (0-9.9) or Rx value (500-999mV).

Flowrate 1.4 litres/hour at 1 bar

It is supplied in kit form comprising:

Peristaltic dosing pump with proportional control

Electrode with probe holder

Suction tubing with footvalve assembly

Discharge tubing with injection fitting

2" pipe fittings for probe & injection fitting

Brackets for wall-mounting

Buffer solutions for calibration

- A) Power supply with 1.4m cable
- B) Running signal from circulation pump
- C) Connectors for pH/RX probe
- D) Suction hose connection
- E) Discharge hose connection
- F) Footvalve/strainer assembly
- G) Injection fitting
- H) Dosing connection for 2" pipe
- I) pH/RX probe
- J) Probe holder
- K) Probe connection for 2" pipe
- M) Circulation pump control panel
- N) Pool circulation pump
- O) Pool filter
- P) Dosing tank
- Q) Swimming pool
